Lotus Notes

Integrate your business tasks within a single, intuitive desktop client

IBM Lotus Notes is business communications software that brings together email, collaboration tools, and business applications in an integrated desktop solution. With Lotus Notes, you get a reliable, secure messaging and collaboration environment that boosts productivity and streamlines business processes.

Solve your day-to-day business challenges with the advanced communications and collaborative capabilities of Lotus Notes.

- **Powerful collaborative tools** enable your teams to take action, create and share knowledge, and get work done quickly.

- **A single, integrated interface** helps you manage your important business tasks and improve workflow efficiency.

- **The customizable dashboard** allows you to view a breadth of information for faster decision making.

- **The flexible, extensible platform** provides application access through many different clients and devices and allows you to create customizable desktop solutions.

Powerful collaborative tools

- Increase efficiency with tools that facilitate action and collaboration. Start a chat with one click, schedule meetings from your calendar, share bookmarks, and get automatic news feeds.

- Tap into organizational knowledge and enhance global communications with seamless presence awareness and instant messaging capabilities.

- Empower the increasingly mobile workforce with easy access to email, calendars, contacts, messages and documents.

- Connect from your smartphone or any browser. Be productive wherever you are.

Single, integrated interface

- Accelerate your business processes with multiple Lotus Notes desktop applications, accessible from a single integrated interface.

- Search, share, update, and validate information faster and more efficiently with document-driven applications that enhance your business processes.

- Utilize resources from the enterprise or beyond the firewall within your workflow, such as IBM DB2 data servers or third-party SAP software.

Customizable dashboard

- Get rid of cluttered desktops. Import a wide range of business data and get a comprehensive view of that information from the customizable, easy-to-use dashboard.

- Create, update, and access web-based blogs and discussion forums through the Lotus Notes interface. No need to switch applications.

- Customize Lotus Notes with extensions. Access widgets and launch applications through an always-available sidebar.

Flexible, extensible platform

- Boost IT performance with features that provide flexibility, scalability, security and choice options, while reducing software and hardware costs.

- Protect your data with security-rich features that define granular levels of access and encrypt data sent over the network.

- Choose from a wide variety of supported platforms, clients, and browsers. You aren't locked in to a specific vendor or architecture.

Trial software: Lotus Notes and Domino software

Evaluate Lotus Notes in your own environment. Try a full-featured trial version of Lotus Notes for a limited time at no charge.
